S I R :

The present application is a division of allowed parent  
application serial number 09/547,447 filed April 12, 2000.

The specification in the present application corresponds to  
the specification as filed in parent application Serial No.  
09/547,447, except that:

- (1) page 1 of the specification has been amended to  
add a new first paragraph stating that the present  
application is a Division of the parent  
application; and

(2) the amendments made to the specification during prosecution of parent application serial no. 09/547,447 are entered directly into the specification of the present application. No new matter has been added. For the Examiner's convenience in reviewing the changes to the specification, attached are photocopies of the amended pages with the amendments shown by handwriting thereon.

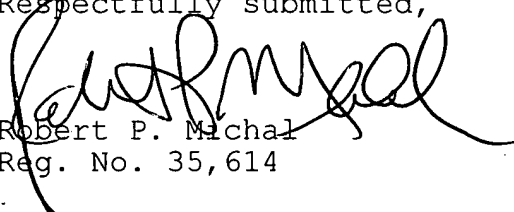

Claims 1-12 of the present divisional application respectively correspond to non-elected claims 32-43 of parent application serial number 09/547,447. The Examiner issued a restriction requirement in said parent application in Paper No. 5 dated March 8, 2001.

The drawings filed in the present Divisional Application incorporate all of the changes made during prosecution of parent application serial number 09/547,447, and comply with all Patent Office requirements. No new matter has been added. Attached are photocopies of the amended drawing figures with the changes shown by handwriting.

It is respectfully requested that prosecution on the merits now proceed.

If the Examiner has any comments, questions, objections or recommendations, the Examiner is invited to telephone the undersigned at the telephone number provided below for prompt action.

Respectfully submitted,

Robert P. Michal
